

Total RNA Electrophoresis

Your ID:

Your name & Leader name of reseach group:

Date:

Rounds:

"total RNA QC"

Please include photograph(s) of the gel electrophoresis for the total RNA in the space below with all RNA samples sent to the Microarray Center (electrophoresis method: electrophoretic analysis using 1.1% formaldehyde agarose gel). In this case, describe which RNA samples correspond to the RNA in each lane in the photograph (i.e., which lane contains each RNA sample entered into the item "Tube Label" on the "Microarray System Utilization Form") so as to permit us to match each RNA sample shown on the gel with its corresponding "Tube Label." Be sure to write clearly and legibly.

Attach the photograph and include the information below.
